REDEFINING WHERE
AUTOMATION BEGINS

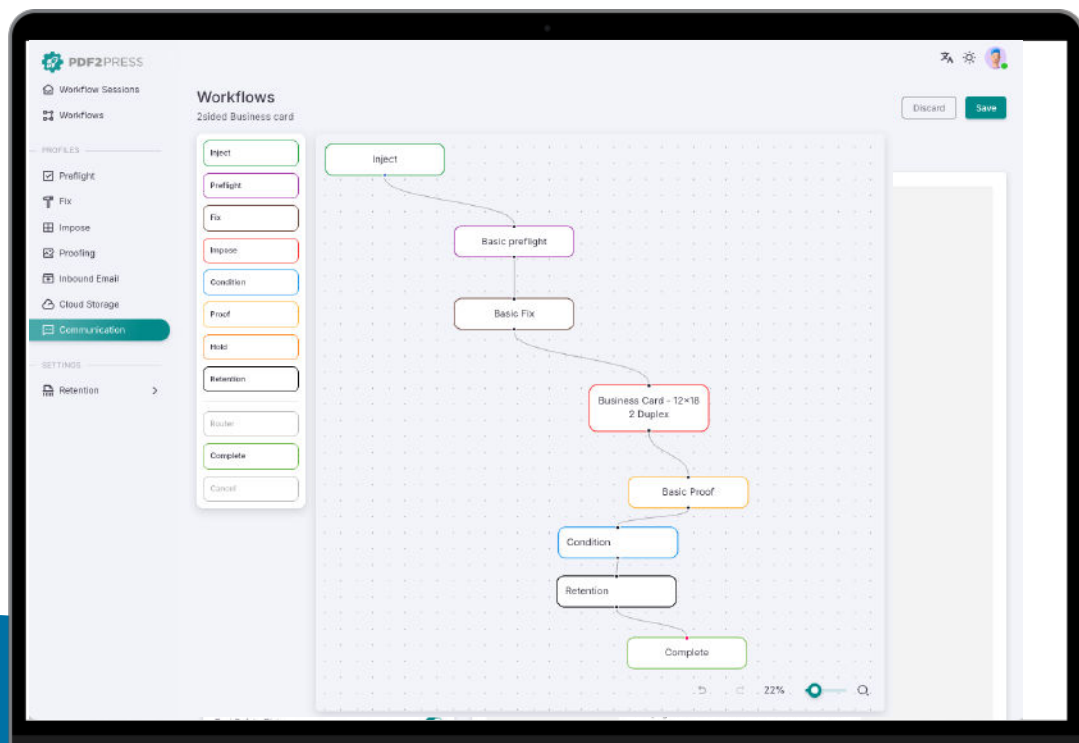

PDF2PRESS

REDEFINING WHERE AUTOMATION BEGINS

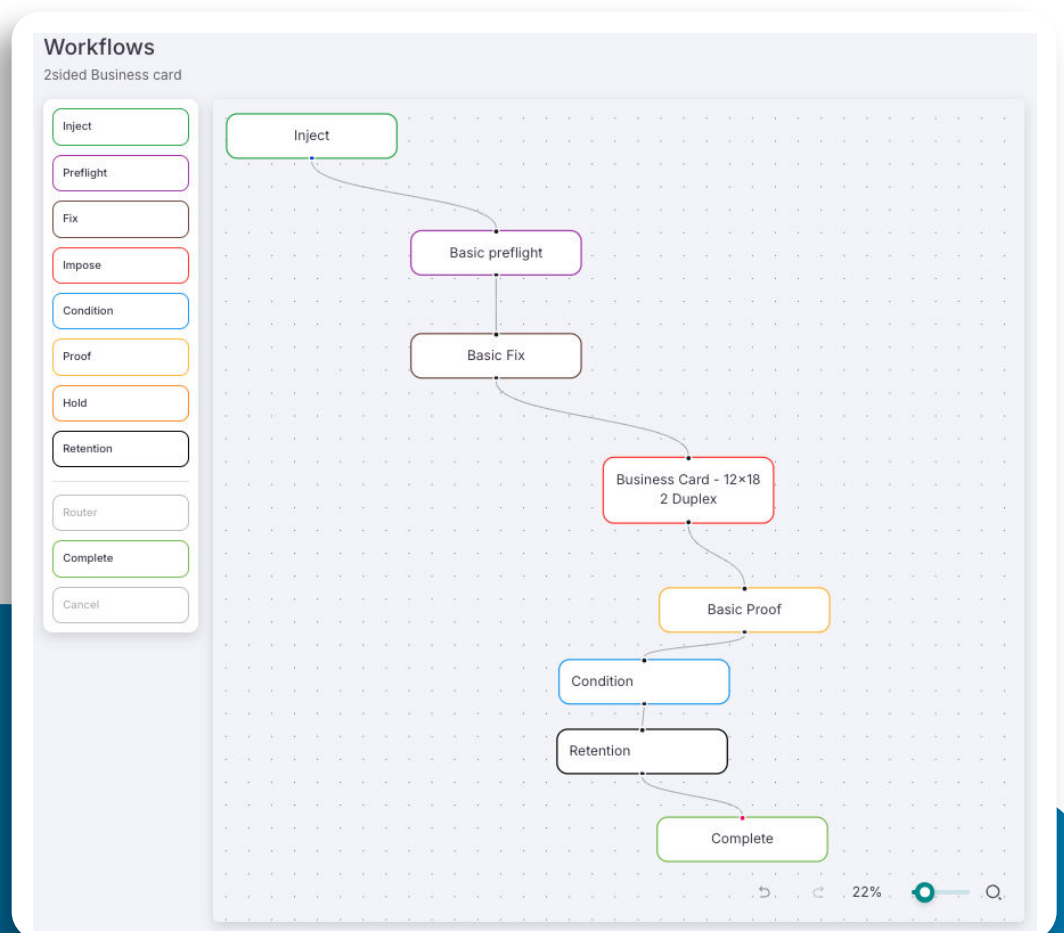

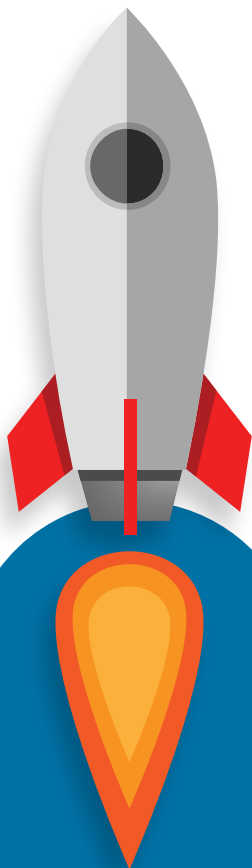

Prepress at order-entry. Most preflight and proofing software begins after the job has been received. With PDF2Press site users can receive and approve proofs all before submitting an order.

More Automation. PDF2Press streamlines processes for your production team so the files you receive have less touches from start to finish, and your production team can get right to fulfillment.

AN INTUITIVE WORKFLOW BUILDER

More Customization. Create workflows for individual products or uploads. PDF2Press even allows for different workflows for multiple uploads for a product; one upload for a cover file and a separate upload for text files. Each workflow can have different steps or processes and will generate impostions and proofs for your customer.

Preflight

The screenshot shows the 'Preflight Profile' interface for a 'Business Card'. It features a sidebar with 'Options' including Document Integrity, File Size, Image Resolution, Page Dimensions, Page Count, Page Multiples, Page Orientation, Empty Pages, Bleed, Spot Colors, Fonts, Rich Black, and Overprint. The main area contains several panels: 'Document Integrity' with checkboxes for 'True Font Embedding', 'Fail if form fields exist', 'Accurate Reporting', and 'Fail if annotations or stamps exist'; 'Image Resolution' with 'Fail' and 'Warn' options measured in DPI; 'Bleed' with 'Maximum Size' and 'Warn if the document contains sufficient bleed'; 'File Size' with 'Maximum Size' and 'Warn if PDF is over size'; 'Page Dimensions' with 'Width', 'Height', and 'Tolerance' settings; and 'Text Safety Distance' with 'Distance from Gutter' and 'Warn if too close'.

Preflighting and Fixing:
PDF2Press preflights artwork files, identifying and correcting many issues to ensure they meet print-ready standards.

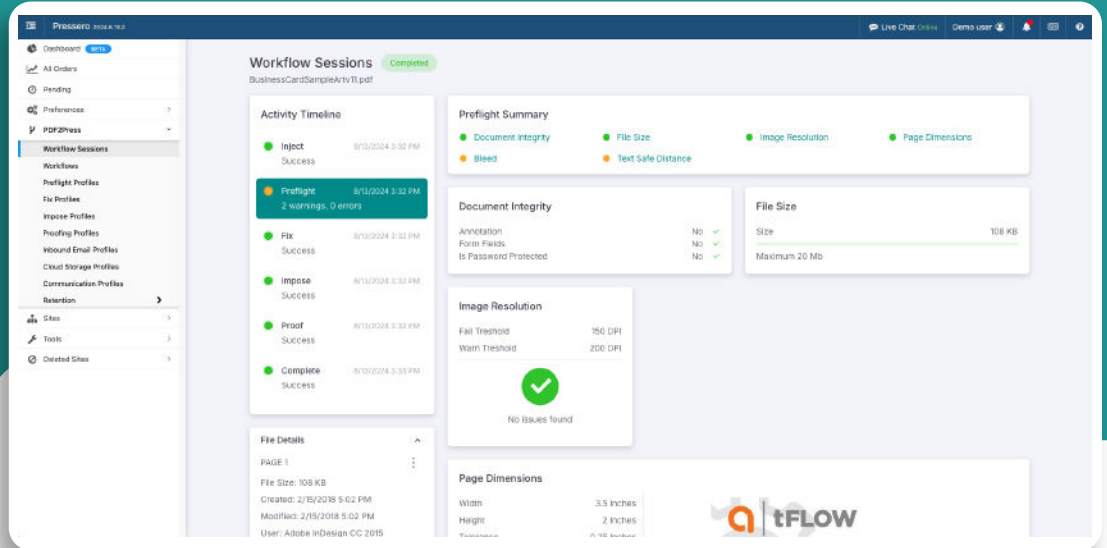

Automated File Fix

The screenshot shows the 'Fix Profile' interface for a 'Business Card'. It features a sidebar with 'Options' including Colorspace Transformation, Resize Pages, Image Resolution, Truncate Pages, Add Bleeds, Add Trim Marks, Rich Black, Fonts, Overprint, and Flattening Transparencies. The main area contains several panels: 'Colorspace Transformation' with 'ICC Profile Colorspace' and 'GRACoL2006_Coratedv2.icc'; 'Image Resolution' with 'UpScale' and 'Measured in DPI'; 'Add Bleeds' with 'Bleed Size' and 'Warn if too close'; 'Overprint' with 'Set Overprint for Spot Colors' and 'Set Overprint for Black Objects'; 'Resize Pages' with 'Width', 'Height', 'Scaling', and 'Scale Stretching'; 'Rich Black' with 'Convert 100% Process Black Objects' and 'Reduce Rich Black Objects'; and 'Flattening Transparencies' with 'Resolution' and 'Measured in DPI'.

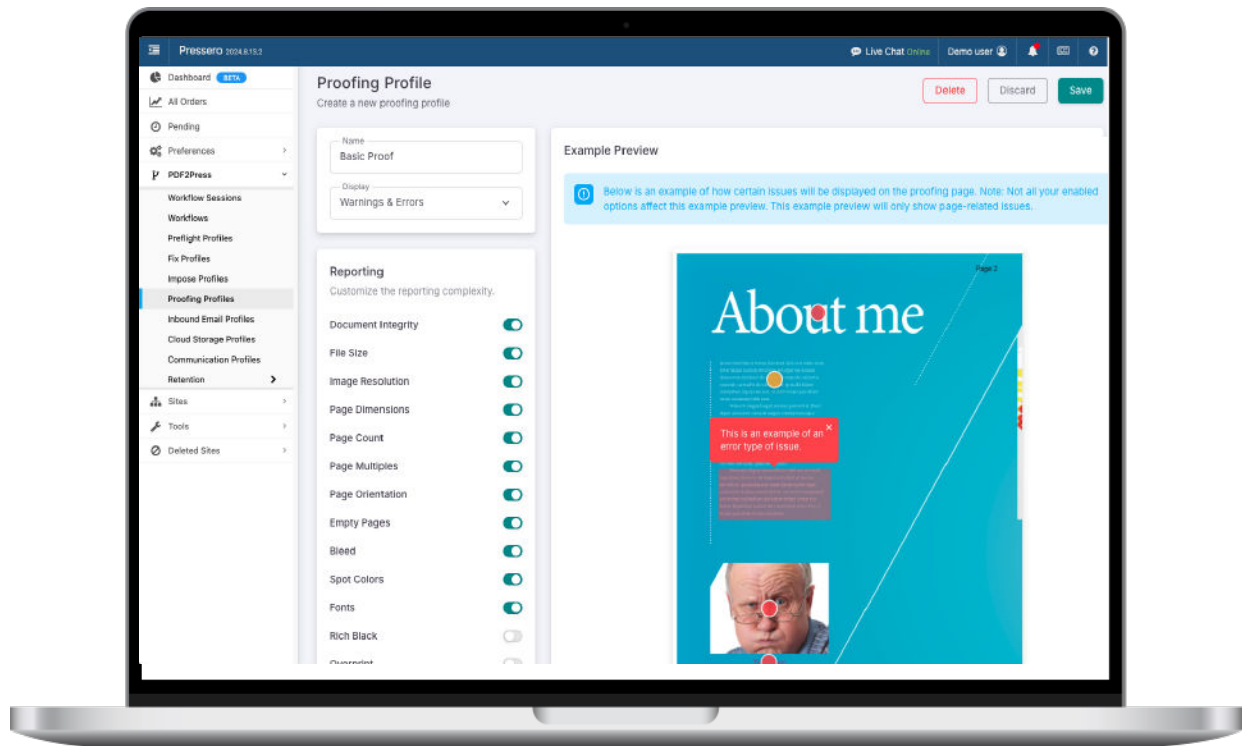

PDF2PRESS

Prevent Print Errors

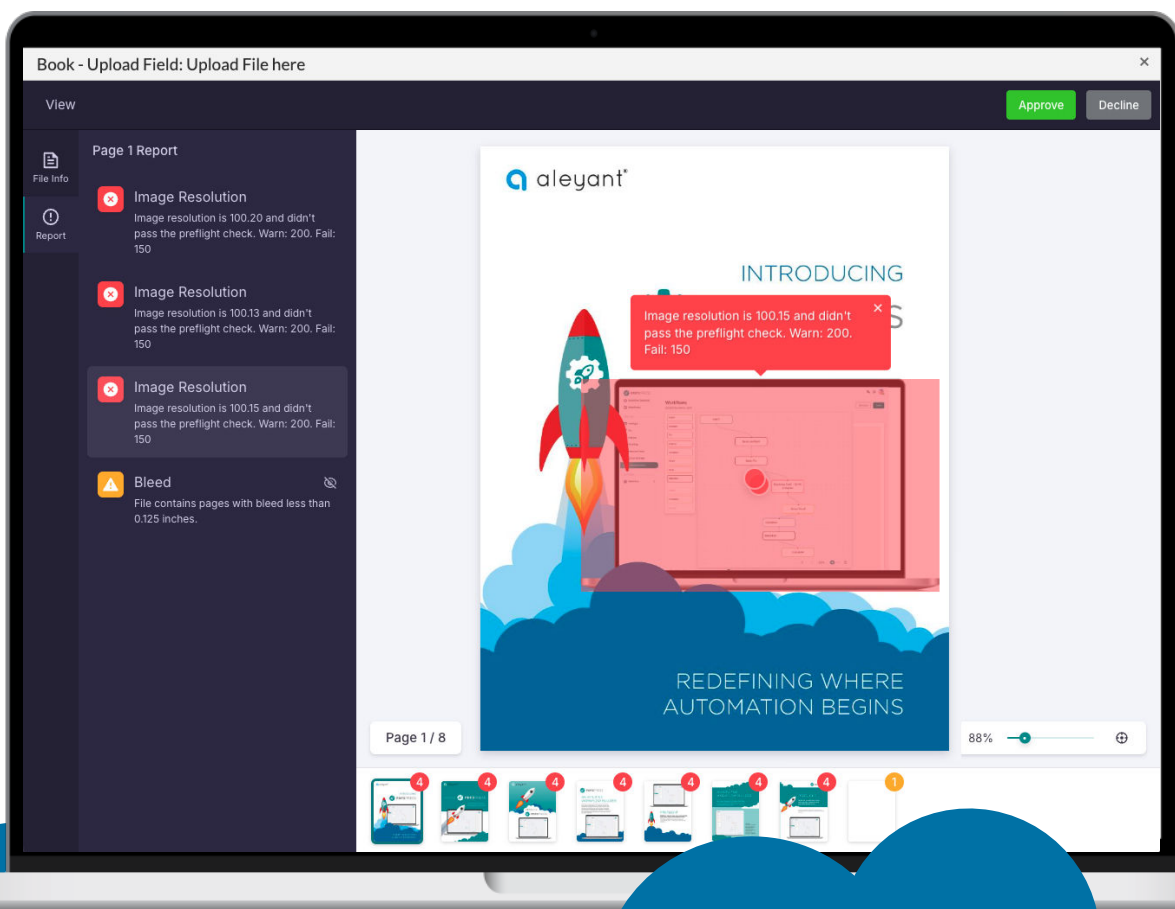

File Errors: Detect & Fix potential print file issues before they delay and disrupt production. Analyze files for image quality, fonts, colors, document structure, page count and much more.

Proofing

Customers can approve proofs, automatically advancing them forward in the production and fulfillment process. PDF2Press allows for proofs during the checkout process or after the customer has checked out.

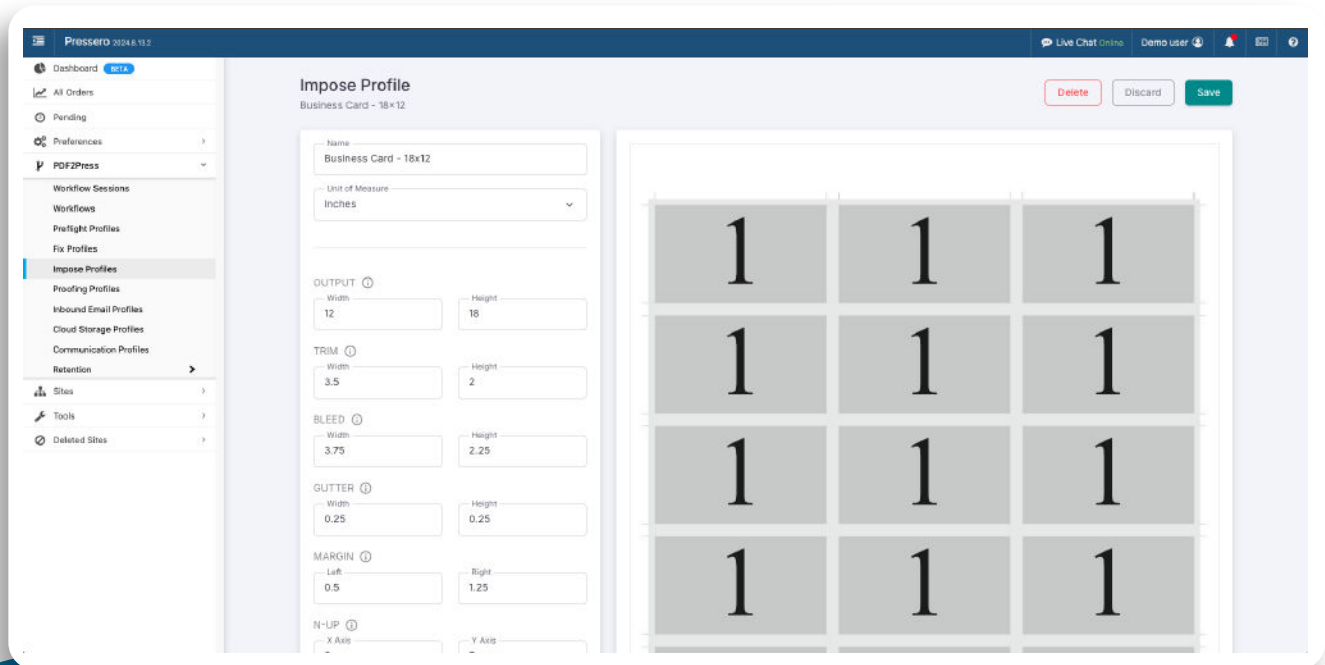

Production Ready

Include imposition in your workflow to include:

- Step & Repeat
- Saddlestitch
- Cut & Stack
- nup

Integration with Pressero's AWI (Automated Workflow Integrator) creates touchless file downloads directly to production hot-folders.

PDF2PRESS

PDF2Press automates the entire process of art file management, from initial upload to final proofing and creation of imposed production files. Key features of this innovative software include:

**Accept files from various sources:**

Uploads from Pressero, PDF2Press can watch email inboxes, cloud storage, and work through an API, providing flexibility and convenience for your customers to submit art files.

**Customizable Workflow Builder:**

PDF2Press offers an intuitive, customizable workflow builder that allows users to create workflows at a site-level or product-level.

**Automated Artwork File Upload:**

Your customer's artwork files are easily and automatically processed by PDF2Press.

**Preflighting and Fixing:**

PDF2Press preflights artwork files, identifying and correcting many issues to ensure they meet print-ready standards.

**Automated Proofing:**

Customers can approve proofs, automatically advancing them forward in the production and fulfillment process.

**Consistent output:**

Utilizing PDF2Press you ensure that each file is preflighted and fixed to your exact production standards.
